

## Amending Sophos Enterprise Web Control

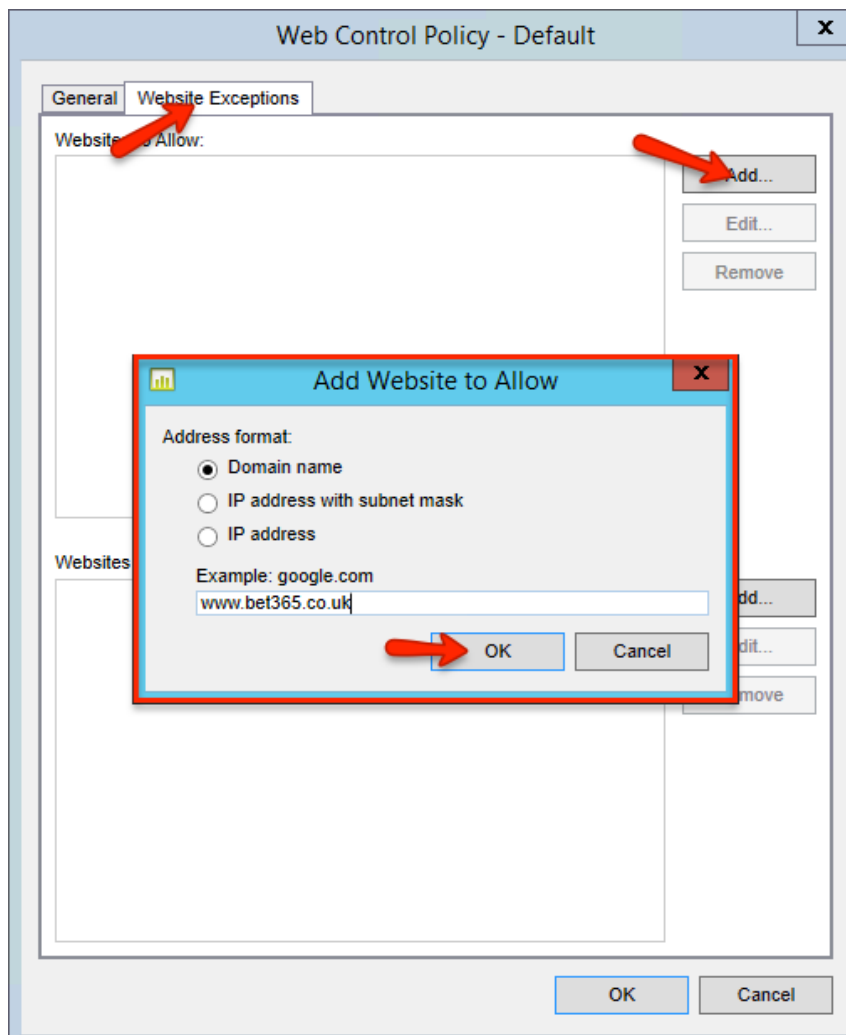

- Once you have enabled the Sophos Web Control feature, you may find that certain sites that you required are getting blocked.

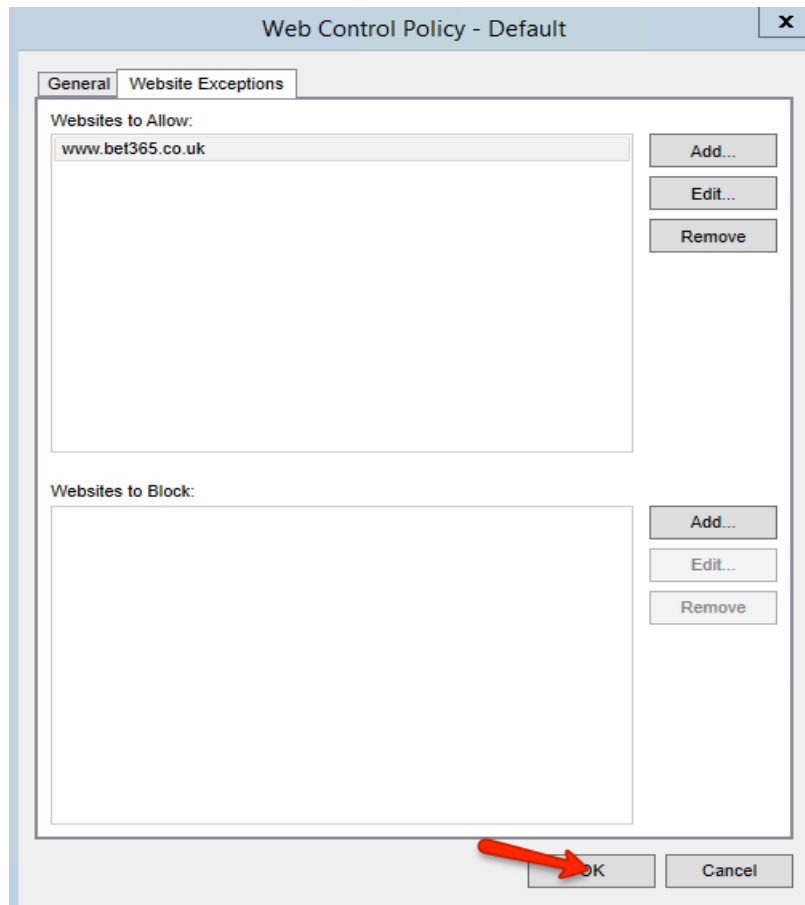

- To allow this website you can amend the Web Control policy to add an exception.

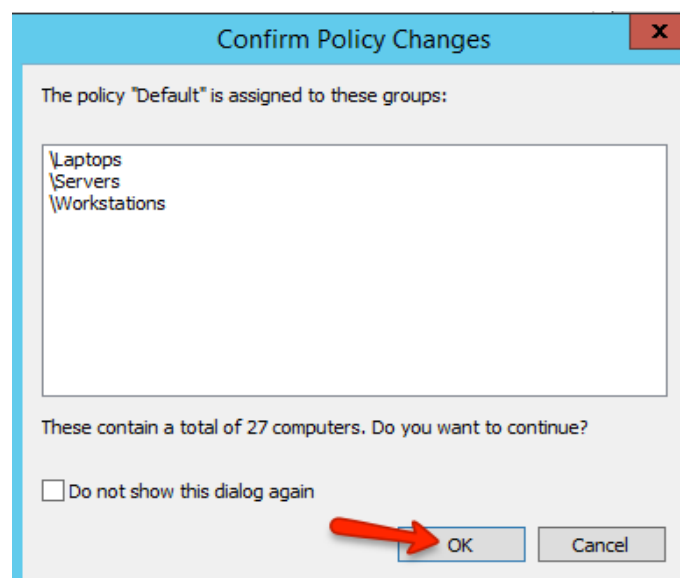

- Edit the Web Control's policy
- Select the Website Exceptions Tab
- Select Add in the Allowed Website
- Add the full website that you require

- Select OK to close.

- Confirm the policy changes to your groups.

- The Enterprise Console will then transfer the new policy to the endpoints.

The screenshot shows the Sophos Enterprise Console interface. The main window displays a table of computer details. A red box highlights the 'Web control status' and 'Web control policy' columns for several computers. The table has the following columns: Computer name, Web control status, Web control policy, Web event count, and Group.

Computer name	Web control status	Web control policy	Web event count	Group
AGOLEY-PC	Active	Awaiting policy transfer	0	\\Laptops
