

# elecworks™ Tips & Tricks

## Publishing to eDrawings®

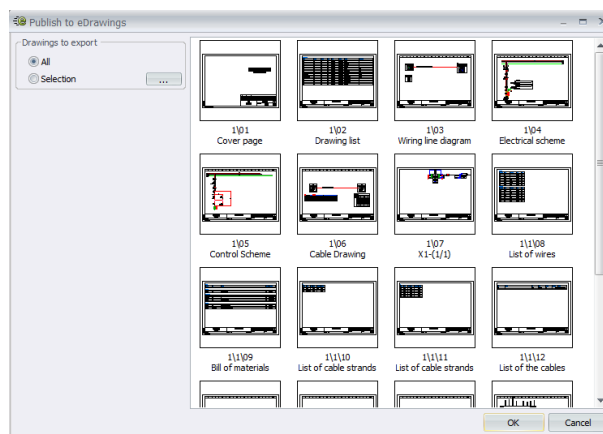

You can collaborate more effectively with everyone involved in product development by using eDrawings® software, which dramatically eases sharing of product design information.

eDrawings® offers capabilities like point-and-click animations that make it easy for anyone with a PC to interpret and understand 2D and 3D design data. eDrawings® mobile is also available on iOS and Android.

Select the *Import/Export* ribbon tab

You can be selective over the drawings to publish

Your project will be published as an eDrawings® multi-sheet file and will have a table of contents
