Changing the Project Directory's Path

All Electrical Designer Users

When you install or configure Electrical Designer you can specify the directory paths for projects (PR), libraries (LI), catalogues (CA), templates (M) and reports (F).

As an example all projects will have their own unique sub-directory within the PR directory.

However you are able to have your own unique directory location for each project and furthermore a unique structure on a per customer basis or on a machine type basis.

An example of this is that you may have a directory tree of:

Projects	Customer Name	Project Name
\PR\	ABC\	ABC123
	XYZ\	XYZ987

This enables you to have all of a particular customer's projects located in their own directory tree structure and therefore easily identifiable from Windows Explorer.

Modifying the path of an existing project:

A path of a project can be easily changed.

Simply select the command Select Directory Select Other Directory

T: 01784 419922 E: sales@cadline.co.uk W: www.cadline.co.uk CADline Ltd, Northumberland House, Drake Avenue, Staines, Middlesex, TW18 2AP

Directory of t	ne project ED	1		
O Default dire	ctory			
C:\ED200	3\PR\ED1			
 Other direct 	ory			
			\ED1	
Move proje	ct contents			
	<u>A</u> ccept	<u>C</u> ancel	Help	

Ensure that Move Project Contents is ticked

Select Select Select Accept after the new location is selected Select Accept to close the Edit Project dialogue

Specifying the path of a new project:

The Directory option in the Create Project dialogue does not become available until the project has been created.

Create project <105>	
🚓 – Name of the project –	Dates
TEST2	No. of drawings 0 Creation 01/07/2008 🗸
	Associated library BS Modification 01/07/2008 🗸
Password	Status AVAILABLE
	Price/hour 0.00
Description 1 / 3	
Description 2 / 4	
Project code	Standard
Remarks	
Project Data 1:	
Project Data 2:	
Project Data 3	
Device the Device of L	
Project Data 4:	
Analysis	Formula Directory Numbering Prototype
	Accept Cancel Help

Therefore you have to create the project in the default Electrical Designer directory location. Once done, you can follow the steps defined in *"Modifying the path of an existing project"*.
