Autodesk Vault – Copy Design Vaulting restriction

In some instances, particularly after a new install of Autodesk Vault, users may experience Vaulting restrictions when using the copy design tool. This guide shows how to remedy the error.

Autodesk Vault users

When doing a copy design, a vaulting restriction error pops up (similar to the illustration below)

Copy	Design Restriction			×	
	restrictions	.ipt' cannot be	ipt' cannot be copied due to vaulting		
	restrictions.		Close	Details >>	

The first thing to do in this instance is to click on the Details >>> button to see what additional information we can gather about the problem. From the message below, we can see that we need to specify the correct Inventor Project file for the files we are trying to copy.
