

# Loading ModelDoc.cui

Loading missing menu group in AutoCAD 2013 within Inventor Suite for 2D layouts linked to Inventor 3D models.

All users with Inventor 2013 Suites

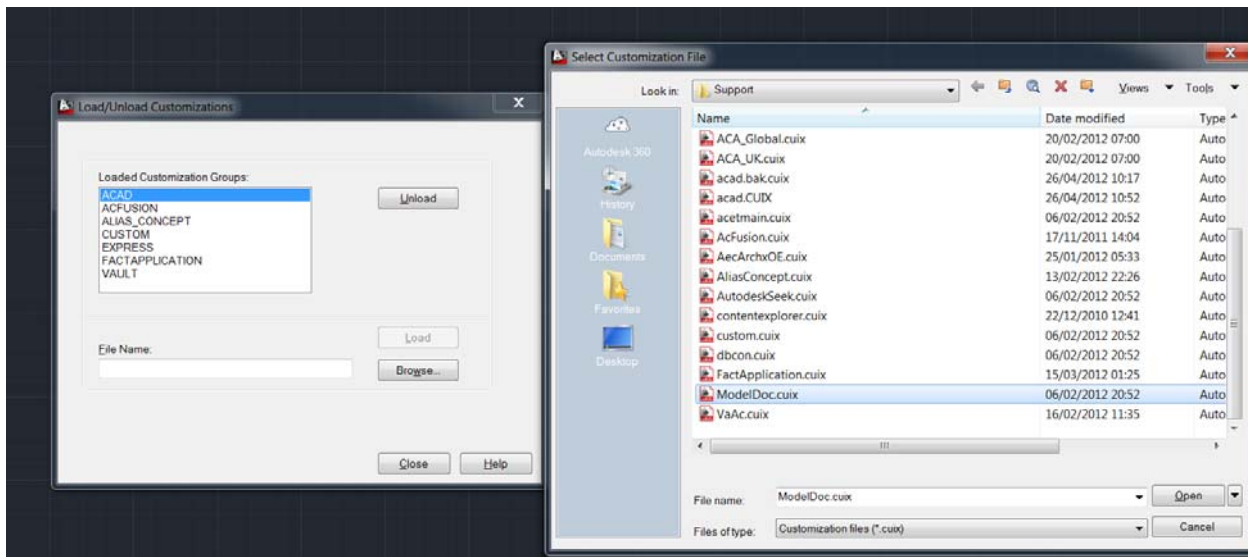

After installing one of the Inventor 2013 Suites, users may encounter that the Layout tab in AutoCAD 2013 has some essential tools to link to Inventor models missing.

The following image shows the Layout tab with the Inventor link tools missing:

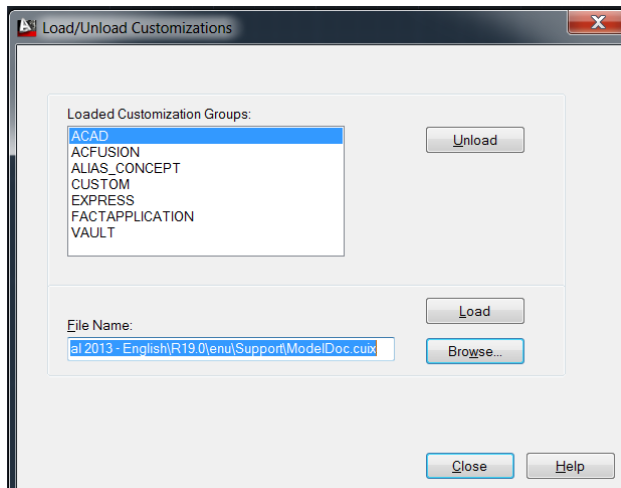

To remedy this, first enter from the Command Line `MENULOAD`

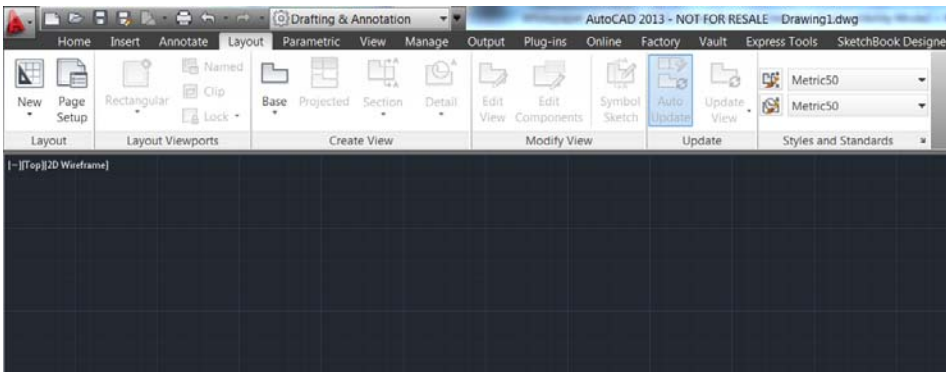

From the 'Load/Unload Customizations' dialog, select the Browse button then open the file ModelDoc.cuix from the list of files:

The file and path will there appear in the File Name window, then select the Load button. Close the dialog when completed:

The following image shows the additional tools available after the Load:

Use the Base button > Inventor to start a layout using Inventor linked files. Select the Inventor Project file and models as required:
