

# Autodesk Vault – Error Codes

This is a quick guide as to troubleshooting potential issues with your Vault and figuring out what the error codes you see mean

IT Departments, System Administrators

Group Code/Error Code	Error Description
SysErrCodes	
0	Error code is not valid or is unspecified.
CoreErrCodes	
100	Error creating the knowledge vault in database.
101	Script to prime the database with its schema failed.
102	Knowledge vault already exists in database.
103	Attempt to create user in database failed.
104	Error adding user role in database.
105	Error removing user role in database.
106	Error validating the principal as being a secure principal (i.e. authenticated).
107	Principle requirement does not match. Should be anonymous.
108	Requires new transaction, but transaction was not created.
109	Error initializing knowledge vault in database.
110	Stored procedure cannot be found.
111	Error getting relative resource path.
112	File stream is null, so the crc code can't be calculated
113	File is not readable, so the crc code can't be calculated
114	Could not create (Knowledge)VaultMaster Database
115	Could not create (Knowledge)VaultMaster Database schema
116	Could not initialize (Knowledge)VaultMaster Database tables
117	Failure during migrate of a KnowledgeVault
118	Failure creating VultSys user for the DB

119	Failure during migrate of KnowledgeVaultMaster
120	Failure updating the KnowledgeVaultMaster stored procedures
121	Failure deleting the KnowledgeVaultMaster
122	Failure updating user information
123	Could not update EIDatabase table
124	Failure moving the file store
125	Failure attaching a database
126	Failure detaching a database
127	Failure deleting a Vault
128	Failure backing up
129	Failure restoring
130	Unable to determine the version of a KnowledgeVault or Master
131	The database master login is invalid
132	The directory is not empty
133	The Knowledge Vault referenced doesn't exist
134	There are Knowledge Vaults still attached.
135	Failure activating a vault
136	Failure deactivating vault. DB is probably in use
137	One of the inputs to the service call is incorrect.
138	Vault name is not allowed, most likely due to illegal characters.
139	Specified folder is illegal.
140	Specified folder is already in use.
141	Could not find global option.
142	Could not find local option.
143	Duplicate User Name
144	Database error because an MDF or LDF file with that name already exists.
145	Database is in use
146	Cannot determine the migration steps.
147	The specified path is too long.
148	Incorrect vault category Id entered
149	The vault's category does not support the operation.
150	The KnowledgeVaultMaster referenced doesn't exist
151	Not enough disk space to perform Backup/Restore operation.
152	Cannot restore db files to a remote location
153	Selected directory does not contain a valid backup structure.
