Quick Display Tip 11 – Layout Tabs

The layout tabs are located at the bottom left hand side of the screen; these are used to produce the environment where the sheet size can be specified, a title block added and multiple views of the drawing can be scaled to suit. In most cases the layout tabs are displayed, but occasionally in some drawings the tabs are not shown.

To hide the layout tabs, right click on any layout tab and from the displayed menu select Hide Model and Layout Tabs, the tabs will disappear.
