## Inventor Publisher and Inventor Fusion Ribbon fix (2012 versions)

This is a quick guide to help Inventor Fusion or Inventor Publisher 2012 users or Administrators correct the display of the Ribbon within the application, in some instances the ribbon will dock on the Right hand side of the application.

## Advanced users, IT Departments, System Administrators

The images below show Inventor Fusion and Inventor Publisher with the ribbon incorrectly displayed. With the ribbon docked in the right hand corner, the view cube becomes difficult to use.

The problem is caused by using tablets, like a Wacom (or similar) for sketching etc.

To resolve the issue, navigate to the Control Panel, then select Hardware and Sound, then Tablet PC Settings

In the Tablet PC settings, click on the **Other** Tab and select Left Handed. This is the default setting and will set your Ribbons back to docking on the left hand side.

Tablet PC Settings
Display Other
Handedness
Change where menus appear on the screen by indicating which hand you write with.
<ul> <li>Right-handed</li> <li>Menus appear to the left of your hand.</li> </ul>
<ul> <li>Left-handed Menus appear to the right of your hand.</li> </ul>
Pen and touch
Configure your pen and touch settings in Pen and Touch. <u>Go to Pen and Touch</u>
Tablet PC Input Panel options
Customize Tablet PC Input Panel features in Input Panel Settings. <u>Go to Input Panel Settings</u>
OK Cancel Apply
