

Fixing a Project

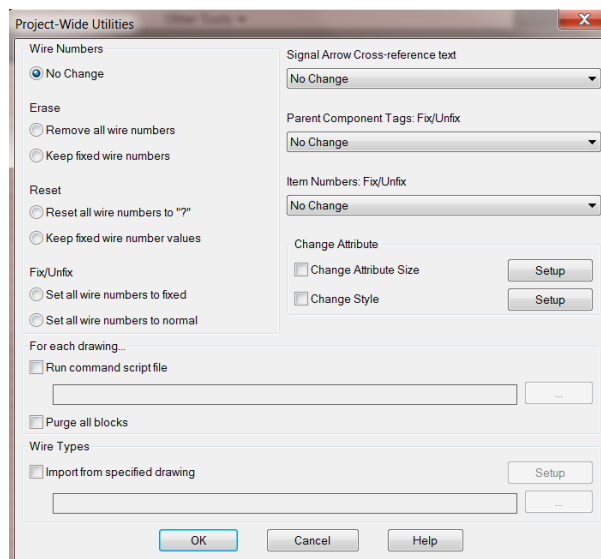

AutoCAD Electrical

When you issue a project for manufacture, you may wish to fix component TAG's, wire numbers and item numbers to avoid the possibility of items being changed inadvertently after build has started or indeed completed.

Of course if you have installed Autodesk Vault, then you have the ability to roll back to the previous issue or indeed several issues previous and that can negate requirement of the following Tips and Tricks.

Select the *Project* ribbon tab > **Utilities** Utilities

Ensure the following is selected:

Ⓒ *Set all wire numbers to fixed*

Parent Component Tags: Fix/Unfix

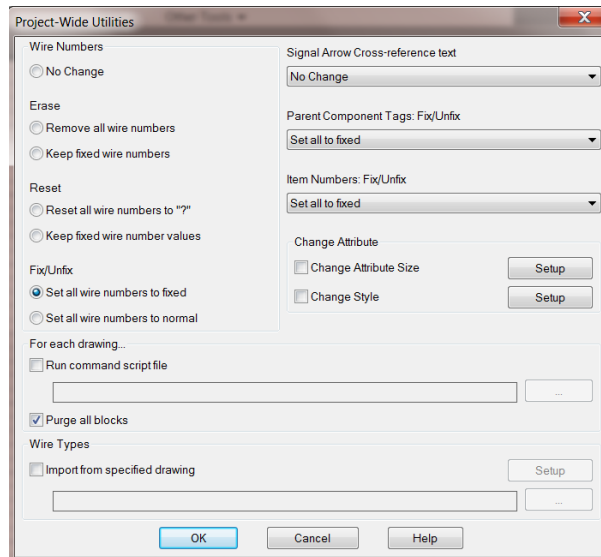

Set all to fixed

Item Numbers: Fix/Unfix

Set all to fixed

You can also *Purge all blocks* to reduce the file size of the drawings

Select 

Select  *Project*
