

Port numbers for single server FLEXlm setup:

Question:

You want to know port numbers used by Autodesk Network License Manager so that you can open needed ports through your firewall.

-15 error on start-up

Solution:

Autodesk Network License Manager needs the following TCP ports open through the firewall so that client workstations are able to obtain a license from your license server system.

- *lmgrd.exe* needs INCOMING TCP ports 27000 to 27009.
- *adskflex.exe* needs 2080.
