

Using GPO to remove the LICPATH.LIC file:

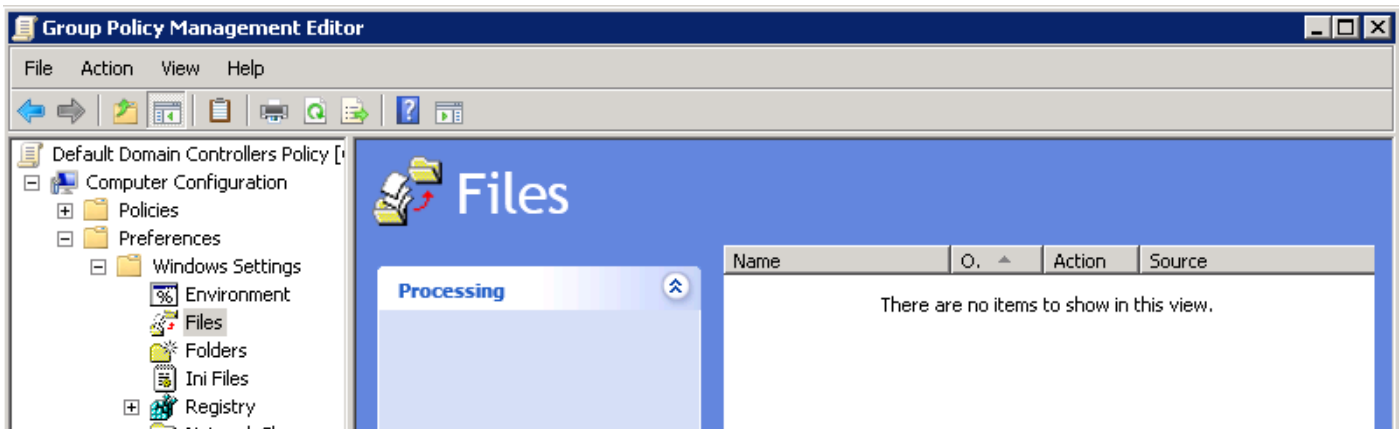

- Open the Group Policy Management console (gpmc.msc)

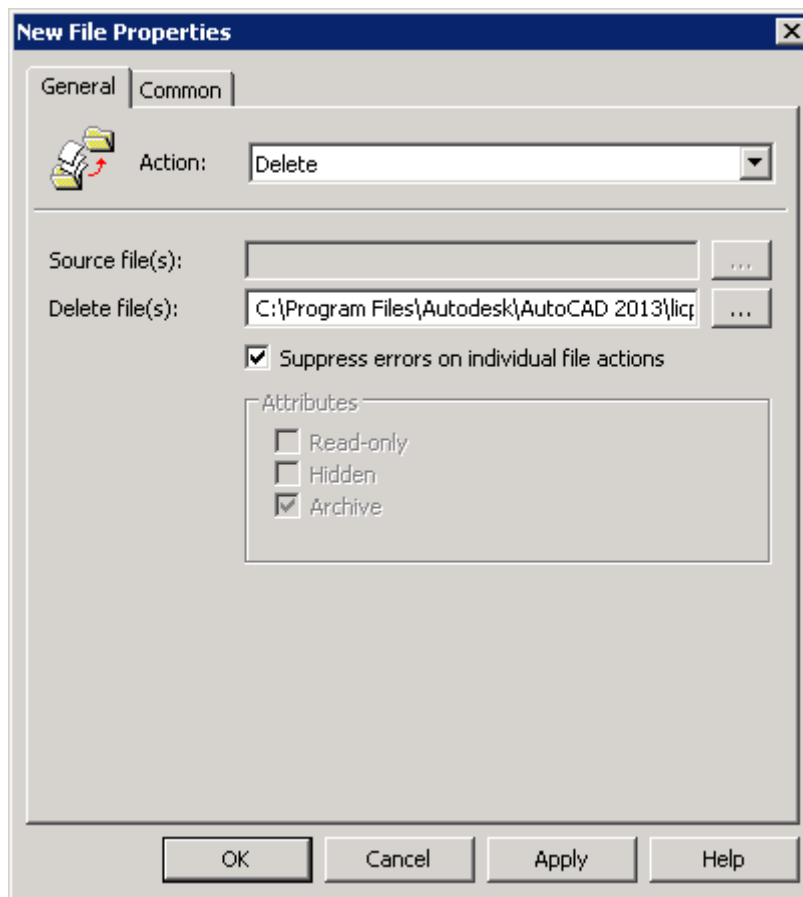

- Edit the Default Domain Controllers Policy

- Browse to the Files section

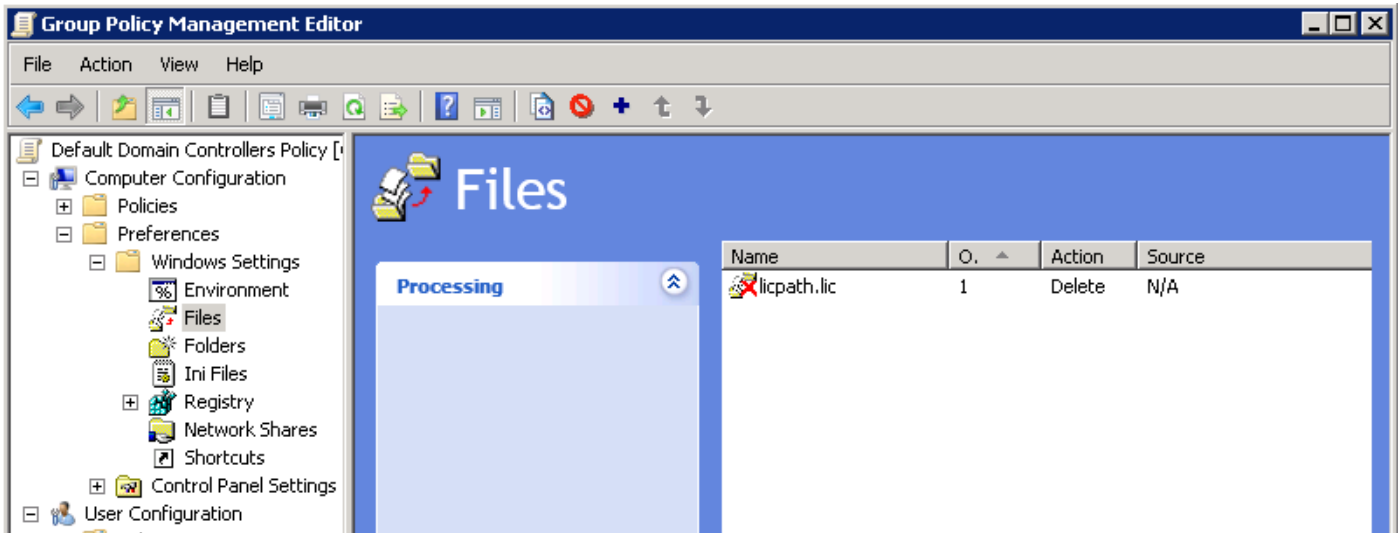

- Right click to select, New >> File

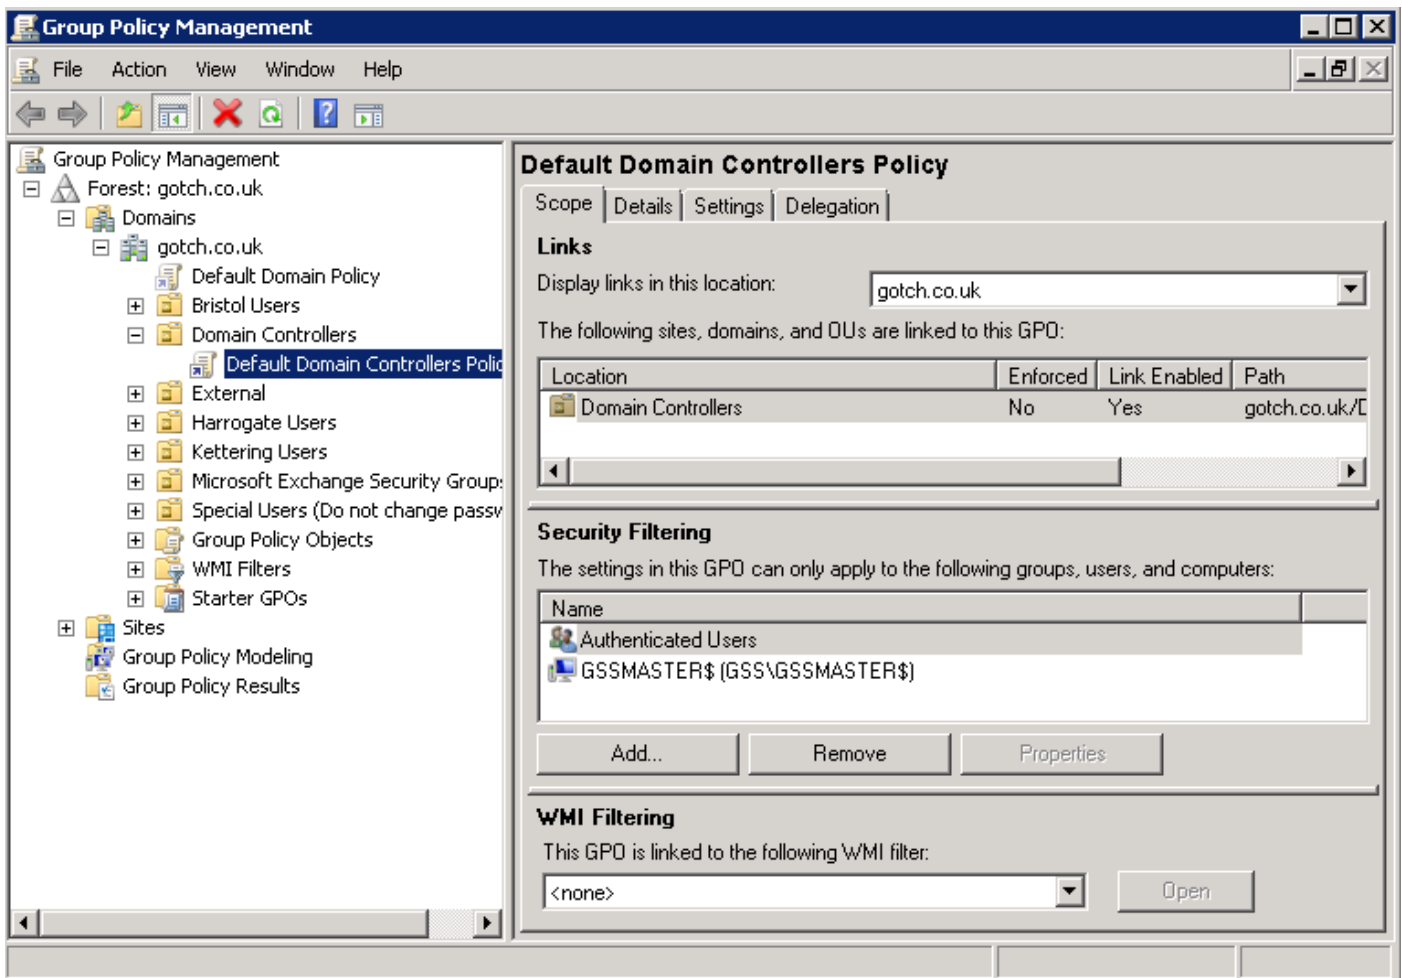

- Set Action to Delete
- Enter the location and file name in the Delete File(s) field. i.e.
 - o C:\Program Files\Autodesk\AutoCAD 2013\licpath.lic

- Apply and OK properties

- Close the Group Policy Management Editor

- Make sure the Security Filtering is set correctly for your machines or user groups that you want to apply the policy too
