

Using GPO to create the ADSKFLEX_LICENSE_FILE environment variable:

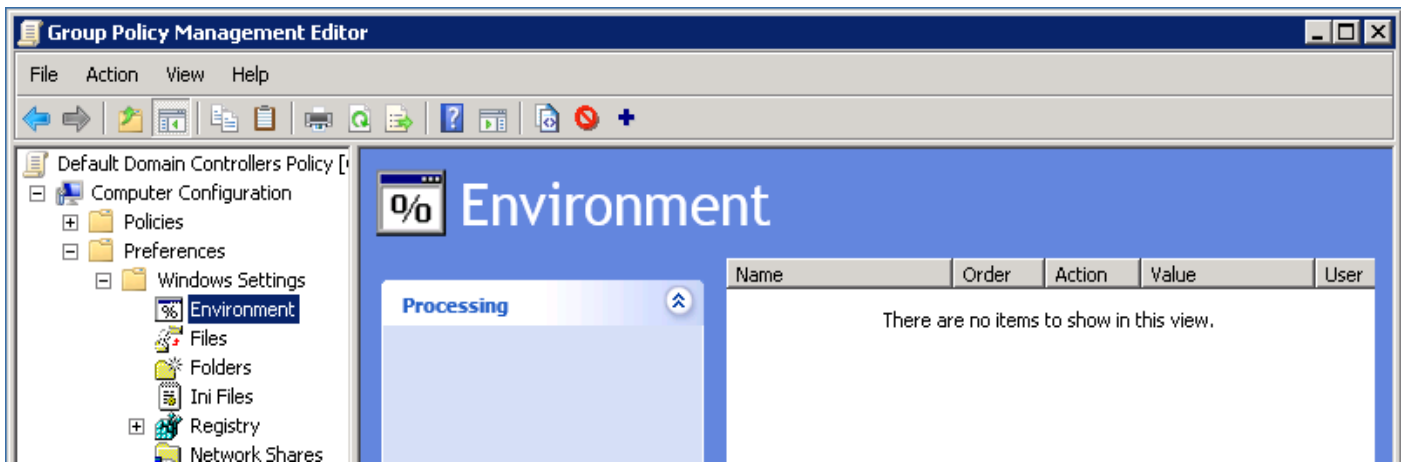

- Open the Group Policy Management console (gpmc.msc)

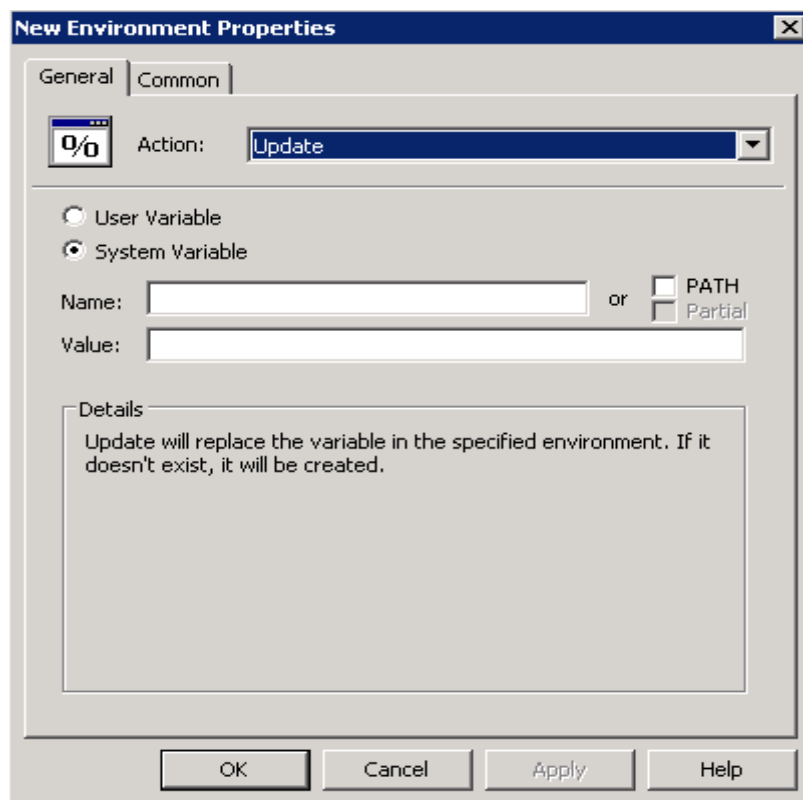

- Edit the Default Domain Controllers Policy

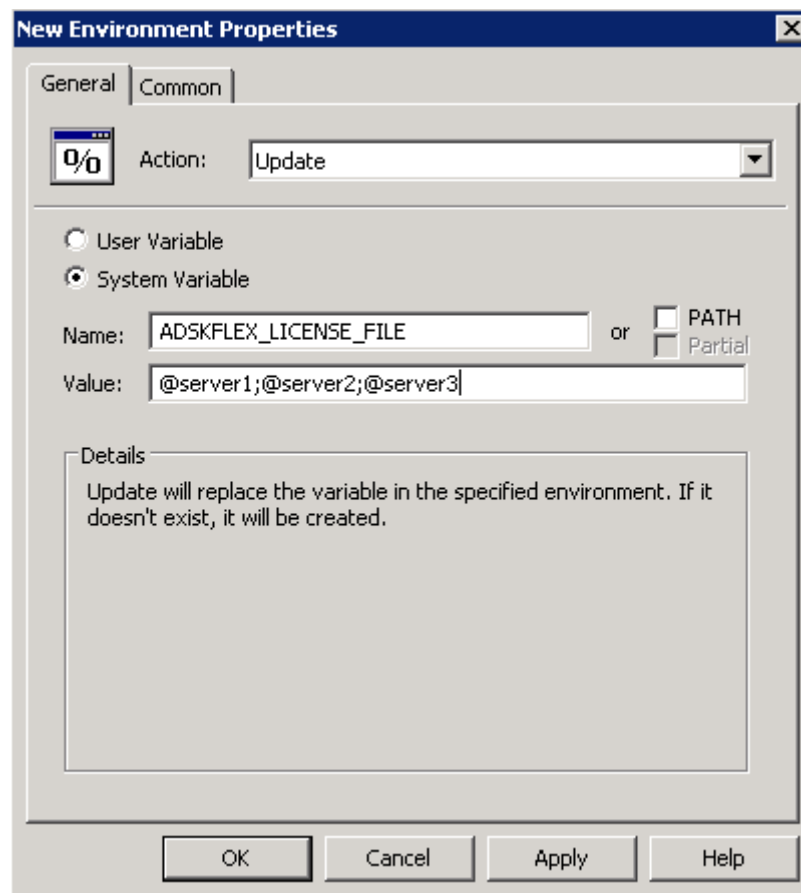

- Browse to the Environment section

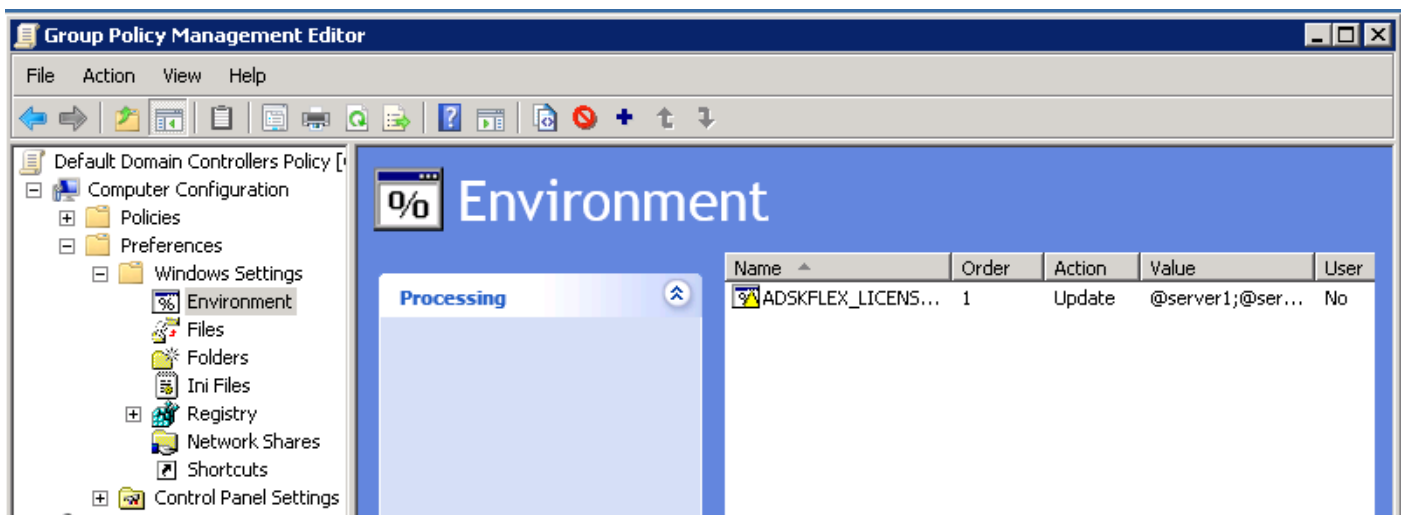

- Right click to select, New >> Environment Variable

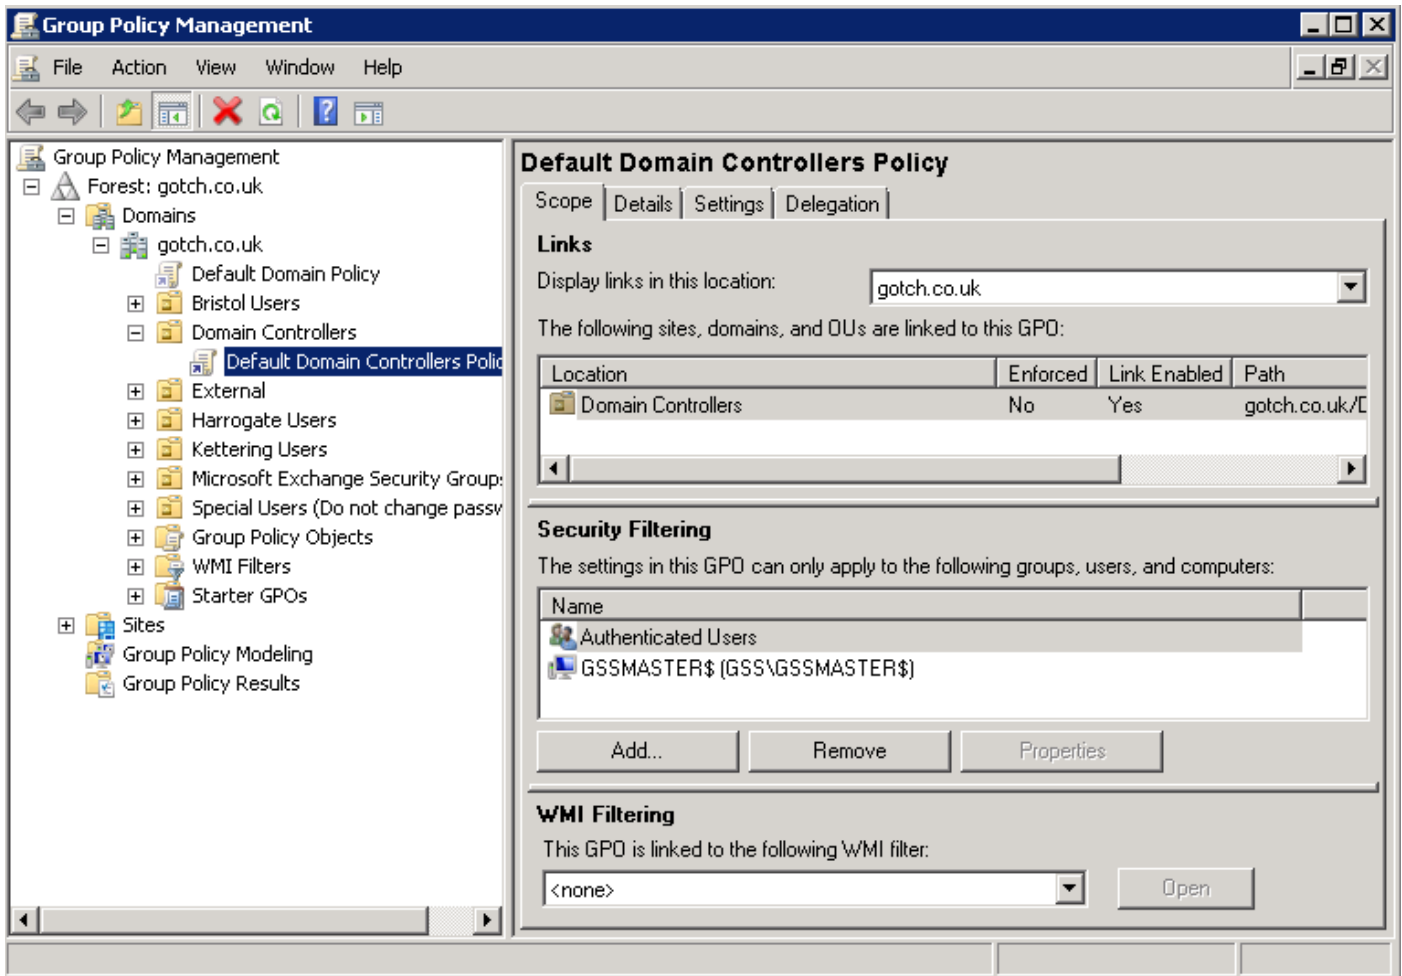

- Select System Variable
- Enter ADSKFLEX_LICENSE_FILE in the Name field
- Enter @server1;@server2;@server3 in the Value field

- Apply and OK properties

- Close the Group Policy Management Editor

- Make sure the Security Filtering is set correctly for your machines or user groups that you want to apply the policy too
