

Measuring Tools

Measure

Place Multipoint Line: Click anywhere on the map to create a line. Double click on the mouse to finish the line. The resulting length will be displayed in the selected units.

Place Shape: Click anywhere on the map to create a shape. The resulting Shape units will be displayed in the tool.

Existing Shape: Click over a shape on the map (polygon or line). The results will be displayed in the tool.

Select Measuring Tools Units: Click on the drop down menu and select the Units (kilometres, Miles, Meters, Acres and Hectares) you wish to display.
