About this Presentation

- Do you want to spend less time on site? Would you like your workers exposed to less risk? Would you like to capture more data (and never miss anything) while doing the above?
- Point Cloud models processed in ReCap 360 can be used in other Autodesk applications, unlocking powerful new workflows that reduce time spent, while increasing volume of data collected.
- This Masterclass will introduce users to common workflows to import, register, edit and then share Point Cloud with design applications like Civil 3D.

Presentation Agenda

- Creating a Project and Importing Data
 - Creating your project
 - Importing individual scan files or folders
- Registering your Scans
 - Registration Modes
 - Accuracy Reports
- Editing Scan Data
 - Creating Regions
 - Taking Measurements
 - Data Services – Project Cleanup
- Sharing Point Clouds
 - Publish to ReCap 360
 - Attaching Point Cloud to Civil 3D
