## elecworks<sup>™</sup> Tips & Tricks

## Defining Your Own Types Of Components Within The Classification Manager

You can create your own types of components defined within elecworks<sup>™</sup>. The new component classification is then used within the symbol and manufacturer part structure. This allows the user to add their own classifications for their specific types of components used.

Select Library ribbon tab > Customisation panel > manager.

In this example we are going to add a new classification of "Cameras"

## Enter a Description of "Cameras"

General		
Class unique ID:	1528106722	
🗃 Master:	Components	
E Description (English):	Cameras	<b>(</b>
System		~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

	•	
😢 User data file name:	<none></none>

Highlight User data 1 and change the label description to "Resolution"

sert Insert Insert Insert Aransiatable data Management	Cut Copy Paste Edit	•
Simplified preview	Data properties	
Description	- Properties	
Description (English):	Number:	0
User data	Translatable data:	Γ
User data 1:	Label	
1 User data 2:	English:	Resolution
Translatable data	French:	Données utilisateur 1
1 Translatable data 1 (English):	Simplified Chinese:	用户数据 1
2 Translatable data 2 (English):	Czech:	Údaje uživatele 1
	German:	Benutzerdaten 1
	Italian:	Dati utente 1
	Japanese:	2-5-91
	Korean:	사용사 네이터 1
	Polish:	Dane użytkownika 1
	Portuguese:	Dados do usuario 1
	Russian:	Данные пользователя 1
	Spanisn:	Datos de usuario 1 Kullania bilailari 1
	Traditional Chinese (Taiwan):	Kullanid bliglieri 1 (使田平)条約1
ou can edit, add or delete the user data. sch Component of type "Cameras" will use this configuration.		

## Change:

User data 2 Optical Zoom

Sel;ect user data to add further fields e.g. "SD Slots"
