

## Social Media Tool

The Social Media tool is available within the **Map > Social Media Tools** menu.

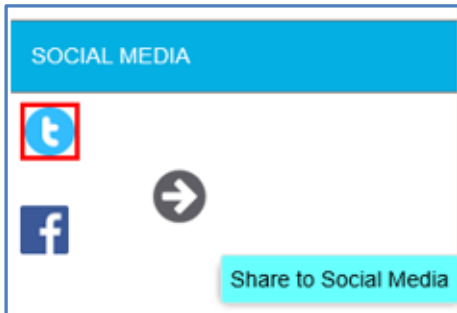

The Social Media Tool allows you to copy your Map Location as a bookmark and share that with other users via your choice of Social Media, including; **Twitter, Facebook, LinkedIn** etc.

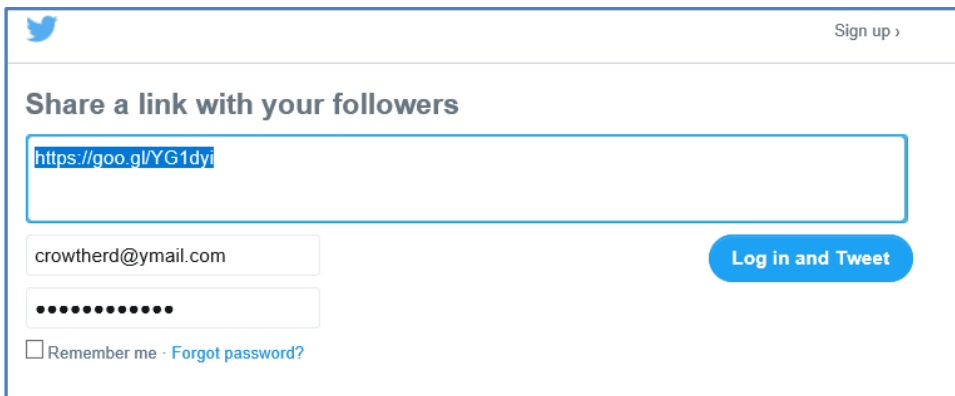

Having chosen your map location and displayed the layers that you wish to publish, in this case the Planning Applications layer:

Now choose the **Social Media tool** and select your choice of platform. In this example we will publish the map to **twitter** by pressing the **Share Arrow**.

The URL (a shortened version) for your current map location will then be passed to Twitter, where you can choose to Share the link.

When a user then clicks on the published link, MapThat will auto open and zoom into the correct location and show the map layers that you published.
