

Restore a Revit Server Project

To restore a copy of the project from your backup:

- Notify users that the project will be rolled back and that activity must be halted.
- Launch the RevitServer admin tool from a command prompt and lock the project you wish to roll back to block user activity:
 - o Location: C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand
 - Command: revitserver lock -folder "Project_1"

- The folder will then be successfully locked.

au Administrator: C:\Windows\system32\cmd.exe	_	×
C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand>revitserver lock -folder "Project_1"		^
Locking folder Folder is successfully locked.		
C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand>_		

- Browse to the Revit Server's Projects location and delete the project you are wanting to restore.

- Using the RevitServer admin tool, this time to unlock the project:
 - o Location: C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand
 - Command: revitserver unlock -folder "Project_1"

Administrator: C:\Windows\system32\cmd.exe	-	×
C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand>revitserver lock -folder "Project_1"		^
Locking folder Folder is successfully locked.		
C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand <mark>\revitserver unlock -folder "Project_</mark>	1"	
Jnlocking folder Folder is successfully unlocked.		
C:\Program Files\Autodesk\Revit Server 2019\Tools\RevitServerCommand>_		

Have users create local copies of this restored project and resume their work.
